

CyberSheeple talks

How to add a talk

CyberSheeple monthly knowledge-share

Export the deck. Attach the PDF. CI does the rest.

CyberSheeple talks

Export from Google Slides

File > Download > PDF Document (.pdf)

Do not use Print > Save as PDF.

Print-to-PDF often rasterizes text and search cannot read it.

CyberSheeple talks

Submit without git

Open Submit a talk on GitHub Issues.

Month and year of the talk. Day is optional.

Who presented: @github, an alias, or a real name.

Drag the PDF into the slides field.

CyberSheeple talks

What happens next

A draft pull request lands with your PDF.

CI extracts per-slide text into slides.md.

After merge, the catalog can search the words on the slides.

CyberSheeple talks

Optional extras

recap.md - a short writeup you actually stand behind.

Not a generated script of an unscripted room.

transcript.md - spoken words, aligned to Slide N,

when you have captions or a recording you transcribed elsewhere.
